

How to Run the Poultry Transport App (For Your Friend)

Step 1: Install Docker (Free)

Download and install Docker Desktop from:

<https://www.docker.com/products/docker-desktop>

Step 2: Unzip the Project

Unzip the file 'Poultry_Transport_App.zip' to any folder on your system.

Step 3: Open a Terminal Window

Go into the unzipped folder and open a terminal or command prompt inside it.

Step 4: Run the App Using Docker

Run the following command:

```
docker-compose up --build
```

This will start the backend, frontend, and MySQL automatically.

Step 5: Open the App in Your Browser

Go to:

- Web App (Angular): <http://localhost:4200>
- Backend API: <http://localhost:8080>

Step 6: Login Credentials

- Admin: Username = admin, Password = admin123
- Driver: Username = driver1, Password = driver123

Need Help?

If you face any issue, ask the original project owner to assist or reinstall Docker.
